

PRE-HARVEST REQUIREMENTS

In order for ADAI to conduct your pre-harvest inspection/sampling, the Licensee OR designated representative must be present on the day of inspection and said person must:

- Know **what variety** is planted, the **date(s) it was planted**, and have access to necessary records for review.
- Know the **plant varieties** and **be able to identify each variety in the grow setting** (see DIAGRAM below)
- Have a diagram of the grow area showing the variety planted in each plot.
- Know which plots will be harvested within the next 14 days.
- Have your seed/propagule invoices and documents of receipt available for review.

NOTE: IF you do not have all the above available when the inspector arrives to conduct the at-harvest inspection/sampling, the inspector will cancel the inspection/sampling and depart. You must then submit another Harvest/ Destruction form, giving another 14-day notice after you have assembled the above information and documents, thus delaying your harvest.

GROWING SITE—Outdoor Field, 5 acres, 4 Varieties Planted

Brilliance planted: 6-23-19
T1 planted: 6-24-19

Cherry Wine planted: 6-25-19
BaOx planted: 6-26-19
