RE: PESTICIDE DEVICES

The code of Alabama of 1975, Chapter 80-1-13-.04 specifically states "Every pesticide or device which is distributed, sold, offered for sale, delivered, or transported within this state shall be registered with the Alabama Department of Agriculture and Industries in accordance with registration and registration requirements of Code of Ala. 1975, §2-27-9."

However, the State of Alabama is not requiring the registration of pesticide devices at this time.

This should not be construed to be an endorsement or approval in any manner. Devices that fall under the authority of the Alabama Professional Services Law, such as but not limited to, Termite/Wood destroying organism/rodenticide devices should consult with our Professional Services Section – 334-240-7261 – to understand laws and regulations that may affect legal use.

Thanks,
